Creating the space to flourish.

**We are one of the
UK's leading furniture,
fixtures and equipment
manufacturers and
supply specialists.**

We manage complex customer schemes across all sectors delivering innovation and optimising costs without compromise.

Our combined strengths in design, manufacturing and end-to-end service delivery make Southern Broadstock Interiors a comprehensive, big thinking FF&E specialist.

Ensuring spaces have the right resources to both support and inspire your people demands specialist expertise and knowledge. That's what we do, day in, day out at Southern Broadstock Interiors.

What we do.

From a single classroom to a complete, progressive workplace transformation, our solutions cover the full spectrum, across every sector.

As a cohesive unit, we can create captivating new environments for Higher Education, Corporate and Public Sector. Designing and building bespoke furniture palettes for the entire industry.

Partnership and consultancy.

We strongly believe in working collaboratively with our clients. It's vital we understand not just your space but the entire building we are designing for. We also work hard to understand the needs of the stakeholders, the time and budget considerations together with the individual project needs and requirements to deliver a truly world class solution.

Spacial planning and design.

Our talented team of space planners and interior designers have an in-depth understanding of workspaces and environments. By embracing the latest software – such as 3D visualisation and 3D walk-throughs, animation and BIM Level 1 accreditation – they specialise in creating inspiring spaces that can positively impact on morale, retention and productivity.

Manufacture and procurement.

Having access to the UK's largest supply chain network in our market means we can provide clients with access to an unrivalled range of products with significant supply chain spending power. We invest heavily in our own manufacturing capabilities and the most up-to-date technology, so we can offer clients an efficient and flexible in-house manufacturing capability.

Project Management.

Our specialist knowledge extends across a range of sectors, from commercial, retail, hospitality, leisure and residential to healthcare, education and Crown procurement; each having its own dedicated expert teams to ensure a single point of contact to provide on-going support across the whole product life-cycle.

Delivery and installation.

Our nationally accredited and UK-wide delivery and installation team works to the highest standards to ensure this key aspect of your project runs effortlessly, on time and on budget. It's only by investing in our own in-house team that we can guarantee the exacting quality you demand.

Furniture management and after-care.

Our highly capable customer service team is always on hand to provide an unrivalled delivery, installation and post project experience. These highly competent and dedicated people ensure we take good care of any queries or questions you may have through the whole life-cycle of the project.

Awards and accreditations.

We are proud to be named preferred suppliers and framework partners by some of the country's most discerning companies and consortia.

To earn this status, all of our products and services must meet the most stringent standards for safety and sustainability. To keep it, we're constantly investing in the future. We hold BIM Level 1 accreditation for Design & Construction and have multiple ISO accreditations for our in-house manufacturing.

Above all, we earn recognition by delivering results. Our work has won multiple awards for design and commercial interiors.

Current frameworks agreements include; Crown Commercial Service, Department for Education, NEUPC, NWUPC and NHS Supply Chain.

Our awards and accreditations:

Responsible and sustainable.

In our own manufacturing we use **only sustainable materials**. Our strong supply chain partnerships mean we can demand the same sustainability of everything else we source and specify.

But beyond the products themselves, we also use biomass generators and carbon neutral boilers. Our major manufacturing plant even burns its own cut-offs to heat the factory. We are also FSC® certified.

Handling logistics and distribution in-house means we can cut our carbon footprint even further, and we carry through our commitment to sustainable working by blanket-wrapping furniture for delivery, instead of wasting single-use packing materials.

As part of our managed services agreements, we also promote recycling and re-manufacturing. To first prolong the life of our products and then make sure as much of them as possible are reused.

Specialist services.

Whatever the space, we can deliver a world-class furniture solution. We have over 35 years of experience in successfully delivering innovative interior design and furniture solutions across a broad range of sectors.

Taking a collaborative approach to planning and design is the key to a successful project. Our first step is to understand your project requirements. This way, we can work efficiently and harmoniously to deliver the solution within your time and budget constraints.

Our space planners and interior designers have an outstanding knowledge of interior environments. Using the latest design software, we create inspirational spaces that positively impact morale, retention and productivity.

Having access to the UK's largest supply chain network in our market is a huge advantage. We can provide clients with an unrivalled breadth of products with significant supply chain spending power.

We invest heavily in our own manufacturing capabilities and the most up-to-date technology, meaning we can offer our clients an efficient and flexible in-house manufacturing capability.

With over three decades of experience in project management across a range of spaces including commercial, retail, hospitality, leisure, healthcare and residential environments; we are more than capable of delivering exceptional results for your project.

We operate a UK-wide hub model, ensuring the highest standards with increased efficiency, guaranteeing the quality that you deserve at crucial stages of your project.

We take pride in looking after our clients throughout the whole lifecycle of your project. Our Customer Service and Aftercare team are always available to help during and after project completion. We're not satisfied until our clients are completely happy with their furniture solution.

If you need any more information, please contact info@southernsbroadstock.co.uk

Social values.

Southerns Broadstock Interiors takes its social responsibilities seriously and aims to manage its operations in a sustainable, economically feasible and socially responsible way.

Our objective is to:

- Help our local communities to manage and recover from the impact of COVID-19.
- Tackle economic inequality by creating new jobs and increasing our supply chain resilience.
- Fight climate change and minimise our environmental impact.
- Improve the health and wellbeing of our staff and communities.
- Provide equal opportunities throughout Southern Broadstock Interiors and our supply chain.

Excellence academy.

Our aim is to be the best every single time. Through our Excellence Academy we are continually reviewing our systems, process and people.

Our approach is focussed on driving innovation, creating service efficiencies, and ensuring we are providing our customers the best possible service.

Inclusive design.

The guiding principle of Inclusive Design is to level the playing field for everybody regardless of their situation. Following an extensive research project, we have developed a creative framework that ensures we are designing for the widest possible range of people.

Human beings are incredibly diverse, as is their behaviour. As built environment professionals we have the opportunity to break down barriers and exclusions. By employing our Inclusive Design process, we are able to identify these barriers, fully understand their impact, and provide solutions accordingly.

We collaborate with our clients throughout the process, building a brief to develop environments that deliver dignity, confidence, convenience and comfort.

By designing and managing the built environment inclusively, the frustration and hardship experienced by many can overcome, with the benefits and improved efficiencies having a positive impact for every single user, in addition to the organisation.

To start your Inclusive Design journey, please contact info@southernsbroadstock.co.uk.

We offer support to develop every aspect of your Inclusive Environment.

Equitable use.

Does the design of your space come across as useful and enticing to those with diverse abilities?

Flexibility in use.

Does your design accommodate a wide range of individual preferences and abilities?

Intuitive use.

Is your design easy to understand regardless of the user's skills or experience?

Perceptible information.

Does the design communicate necessary information, regardless of the user's sensory abilities?

Tolerance for error.

Is your design minimising risks due to the possibility of accidental or unintended mistakes?

Physical accessibility.

Can the design be used efficiently and comfortably with minimum effort and fatigue?

Size and space for approach and use.

Are you providing enough space for reach and manipulation regardless of the user's body size, posture or mobility?
