Furniture collection.

Issue 6. May, 2025.

Creating the
space to flourish.

We are one of the UK's leading furniture, fixtures and equipment manufacturers and supply specialists.

Furnishing spaces for both working and learning, we develop interior solutions that meet your unique needs, deliver innovation and optimise costs.

Our combined strengths in design, manufacturing and end-to-end service delivery make Southerns Broadstock Interiors a comprehensive, big thinking partner for your organisation.

Ensuring spaces have the right resources to fully support and inspire your people demands specialist expertise and knowledge.

That's what we do, day in, day out at Southerns Broadstock Interiors.

Our furniture
collection.

Our furniture collection contains everything you need to build a furniture palette for your project. There's a wide variety of seating, tables, desking and supporting items which have been designed to work together seamlessly, providing all the elements you need to bring your space to life.

Need a little more inspiration? This brochure is only the start. We have a unique combination of in-house manufactured products and access to over 100 supply partners, including industry leading brands such as MillerKnoll, Boss Design, Ocee & Four and Orangebox.

Speak to your account manager today to learn how Southerns Broadstock Interiors can create an interior to support and inspire you, your organisation and your people.

Contents.

What we do.

From a single meeting room to a complete, progressive workplace transformation, our solutions cover the full spectrum, across every sector.

We create captivating new environments for Higher Education, Corporate and Public organisations, designing and building bespoke furniture palettes to answer the most complex briefs.

Partnership and consultancy.

We strongly believe in working collaboratively with our clients. It's vital we understand not just your space, but you, your people and your organisation. We work hard to fully understand the core values and needs of all stakeholders together with time and budget considerations alongside unique project requirements to deliver a first class solution that is bespoke to you.

Spacial planning and design.

Our talented team of space planners and interior designers have an in-depth understanding of workspaces and learning environments. By embracing the latest insights and trends, they specialise in creating spaces that can positively impact on morale, retention and productivity.

Manufacture and procurement.

Having access to the largest supply chain network in our market means we can provide clients with access to an unrivalled range of products. Not only are we a dealer for some incredible brands, but we also offer in-house manufacturing, allowing us to deliver great value, control lead times and adapt our core ranges to meet your exact needs.

Project Management.

Our Account Managers and Project Managers work closely together, offering specialist knowledge that extends across all sectors. By assigning a dedicated team from the very beginning of your journey with Southerns Broadstock Interiors, we ensure there is a point of contact, who truly understands your project, to provide on-going support every step of the way.

Delivery and installation.

Our accredited, UK-wide delivery and installation teams work to the highest standards to ensure the final stages of your project run seamlessly, minimising time and disruption on site, allowing you and your team to get back to work and feel the benefit of your new environment as quickly as possible.

Furniture management and after-care.

Our freindly, highly experienced sales and procurement teams are always on hand to provide an unrivalled customer experience. From initial enquiry, throughout your project's life-cycle and even post installation, they will take good care of any requests, queries or questions you may have.

Awards and accreditations.

We are proud to be named preferred suppliers and framework partners by some of the country's most discerning companies and consortia.

To earn this status, all of our products and services must meet the most stringent standards for safety and sustainability. To keep it, we're constantly investing in the future. We hold ISO 19650 Building Information Modelling (BIM) accreditation and have multiple ISO accreditations for our manufacturing.

Above all, we earn recognition by delivering results. Our work has won multiple awards for design and commercial interiors.

Current framework agreements include; Crown Commercial Service, Department for Education, NEUPC, NWUPC and NHS Supply Chain.

Our awards and accreditations:

Responsible and sustainable.

In our own manufacturing we use only sustainable materials, and our strong supply chain partnerships mean we can demand the same credentials of everything else we source and specify.
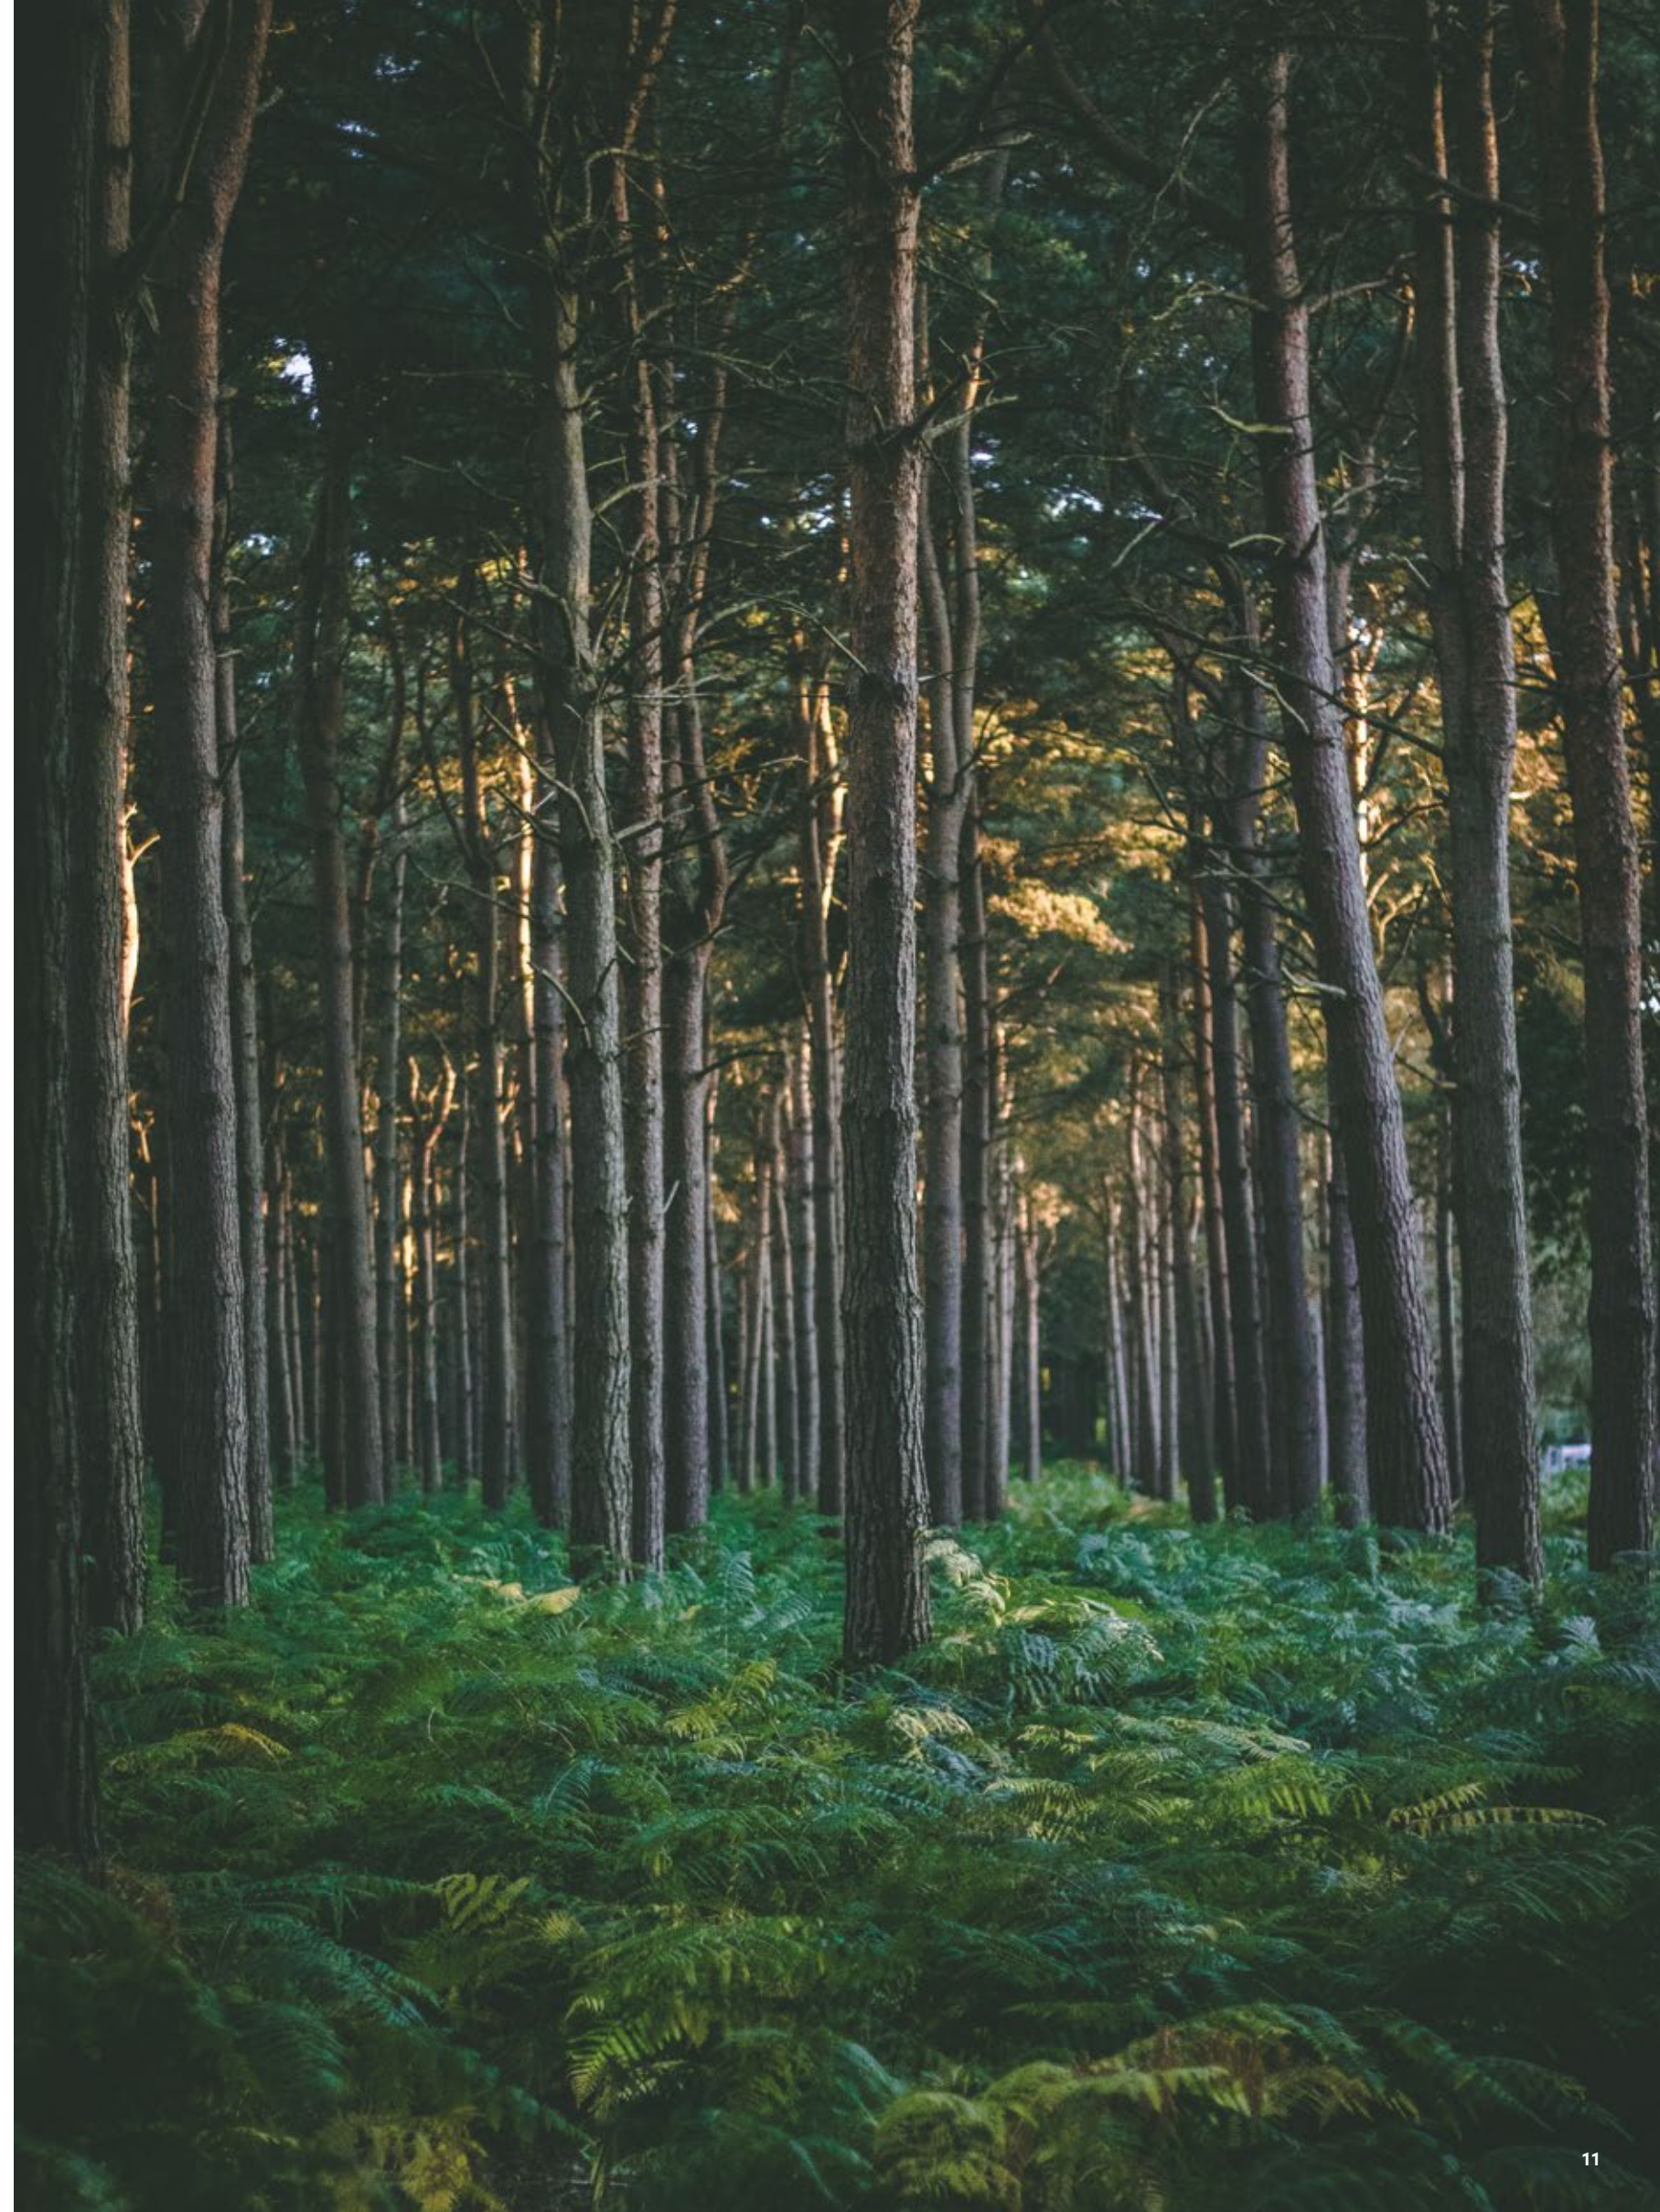

Beyond the product materials themselves, we also use solar power and carbon neutral boilers.

Our logistics and distribution teams streamline our deliveries to increase efficiency and cut our carbon footprint even further, and we carry through our commitment to sustainable working by limiting the use of single-use packing materials.

As part of our managed services agreements, we also promote the re-use and re-manufacturing of our products as well as recycling, to first prolong the life of our products and to make sure as much of them as possible are reused prior to responsible disposal at the end of their useful life.

Experts in education environments.

Looking to the future... A recent AUDE study reported that 61% of students said facilities were an important factor in choosing a university. Even more so than academic rankings in some cases.

With the number of prospective students forecast to hit a historic low in coming years, as well as university applications already dwindling, it's crucial your estate is able to attract and retain students.

We take a data-led approach to interior design, estate management and FF&E. Working closely with universities, our researchers examine the best environments for student learning.

We use our research to plan and create learning spaces that assist in positive outcomes for both students and key stakeholders. Teaching methods are changing. Modern and innovative methods, including remote learning, are becoming increasingly popular.

To attract, engage and nurture students' ability to learn, your physical environment must facilitate these changing demands.

We place high importance on creating partnerships that precede building design. Consulting with various stakeholders, investing in change management, and conducting pilot programmes enables us to recognise pre and post-occupancy trends.

Data is our most powerful tool for improving return on investment for both new build and refurbishment developments. Analysing our clients' learning spaces, and their effect on student outcomes helps inform our development decisions.

Our experience is another vital component in our process. Each campus project we undertake informs and improves the next.

If you need any more information, please contact **info@southernsbroadstock.co.uk**

Specialist services.

Whatever the space, we can deliver a world-class furniture solution. We have over 40 years of experience in successfully delivering innovative interior design and furniture solutions across a broad range of sectors.

From a bespoke lecture theatre to a VR studio, or a meeting room incorporating the very latest communication technology, taking a collaborative approach to planning and design is the key to building successful solutions for specialist requirements.

The first step is to understand your unique requirement. This way, we can work efficiently to deliver the right environment within your time and budget constraints.

Having access to the UK's largest supply chain network in our market is a huge advantage. We provide clients with options from an unrivalled range of products and drive best value thanks to our significant supply chain spending power.

When an off the shelf solution doesnt fit the bill, our product design team, space planners and interior designers lean on their outstanding knowledge of working and learning environments and use the latest design software to create inspirational concepts that deliver the exact results you need.

However complex your requirements may be, we have the team, resource and partners to meet the brief.

If you need any more information, please contact **info@southernsbroadstock.co.uk**

Social values.

Southerns Broadstock Interiors takes its social responsibilities seriously and aims to manage its operations in a sustainable, economically feasible and socially responsible way.

Our objective is to:

- Help our local communities to manage and recover from the impact of COVID-19.
- Tackle economic inequality by creating new jobs and increasing our supply chain resilience.
- Fight climate change and minimise our environmental impact.
- Improve the health and wellbeing of our staff and communities.
- Provide equal opportunities throughout Southerns Broadstock Interiors and our supply chain.

A unique combination.

We have access to both in-house manufactured items and products from carefully selected supply partners. This ensures we can always specify the correct piece of furniture, even for the most complex of projects.

Manufacturing.
From our manufacturing facilities we produce over 50,000 items every year.

Investment.
We invest in the best machinery available and support it with the most up-to-date software.

Efficient and flexible.
We offer our clients an efficient and flexible in-house furniture manufacturing capability, which results in value driven high-quality furniture products.

Bespoke service.
Southerns Broadstock Interiors has the experience and resource to take a blank sheet of paper and create the perfect solution to a client's exact specification.

Inclusive design.

The guiding principle of Inclusive Design is to level the playing field for everybody regardless of their situation. Following an extensive research project, we have developed a creative framework that ensures we are designing for the widest possible range of people.

Human beings are incredibly diverse, as is their behaviour. As built environment professionals we have the opportunity to break down barriers and exclusions. By employing our Inclusive Design process, we are able to identify these barriers, fully understand their impact, and provide solutions accordingly.

We collaborate with our clients throughout the process, building a brief to develop environments that deliver dignity, confidence, convenience and comfort.

By designing and managing the built environment inclusively, the frustration and hardship experienced by many can be overcome, with the benefits and improved efficiencies having a positive impact for every single user, in addition to the organisation.

To start your Inclusive Design journey, please contact **info@southernsbroadstock.co.uk**.

We offer support to develop every aspect of your Inclusive Environment.

Equitable use.
Does the design of your space come across as useful and enticing to those with diverse abilities?

Flexibility in use.
Does your design accommodate a wide range of individual preferences and abilities?

Intuitive use.
Is your design easy to understand regardless of the user's skills or experience?

Perceptible information.
Does the design communicate necessary information, regardless of the user's sensory abilities?

Tolerance for error.
Is your design minimising risks due to the possibility of accidental or unintended mistakes?

Physical accessibility.
Can the design be used efficiently and comfortably with minimum effort and fatigue?

Size and space for approach and use.
Are you providing enough space for reach and manipulation regardless of the user's body size, posture or mobility?

Desks.

Creating a productive workspace.

Work desks are the epicentre of any work space environment. They provide individuals with a dedicated space where they can focus their attention and increase productivity. Helping to dismiss everyday distractions, our desks offer a dedicated area to complete tasks, with all the tools you need close at hand.

From spacious, shared work desks, to those created for a single individual to enhance privacy, along with sit and stand options, we can furnish your office setting with furniture that meticulously meets your specification.

10 YEAR WARRANTY

Aston panel end.

Aston's end panels add warmth, which gives an entirely different feel to your office interior.

This flexible design allows cable trays to be fitted to the inside or outside of the modesty panel for carrying cables horizontally. Cables pass through the modesty panel's open corners and out through the cable ports in the worktop.

Aston panel end.

Features & benefits.

- 25mm thick desktops with 2mm ABS edge.
- 25mm thick end panels with integral modesty panels.
- Cable access through corners of modesty panel.
- Cable baskets fit to front or rear of modesty panel (low mobile ped only with front fitting).
- Easy access silver 80mm diameter cable ports.
- Metal to metal fixings connecting substructure to the desk top.
- Plus 15mm height levelling.

IMPORTANT:
High mobile pedestal not recommended with cable basket fitted to the inside of modesty panel.

Torino.

Torino offers an extensive desk and table solution which includes a desking and benching solution with stylish poseur, meeting and coffee tables.

With the use of natural materials, Torino brings the beauty and warmth of solid oak to the office space. The tapering A-frame leg design brings further style to this contemporary aesthetic, combined with a smooth-to-touch radius edge to the leg.

Torino.

Features & benefits.

- 25mm thick desktops with 2mm ABS edge.
- Robust A-frame FSC certified oak leg.
- Set-back intermediate legs for increased leg space.
- Discreet foot detail with +15mm levelling.
- Metal-to-metal fixings connecting sub-structure to desktop.
- Large scallop at rear of desktop for easy cable access.
- 15mm gap at rear of back-to-back benching for continuous cable access and monitor arm mounts.
- Optional cable cover plates for intermediate legs.
- Optional easy access tilt and drop cable dump to underside of back-to-back benching – see accessories.
- Optional modesty panels – see accessories.
- Not suitable for desk high storage.

Height adjustable desks.

Working in an office can often lead to a sedentary lifestyle. Height-adjustable desks make it easy for users to alternate frequently between sitting and standing with just a press of a button or turn of a handle.

Wellbeing is at the heart of our designs. Engineered to support work in a seated and standing position, alternating between the two can help relieve back and neck pain, improves blood circulation and enhances concentration and productivity.

M-Line crank height adjustable.

Versatile and simple to operate, the M-Line crank height adjustable range is an ideal desking solution for taller people and wheelchair users. The user can adjust the desk height from 660 to 960mm high simply by turning a handle.

Features & benefits.

- 25mm thick desktops with 2mm ABS edge.
- No power source required.
- Cantilever set-back verticals offer increased leg clearance.
- Horizontal modesty panel for increased strength and stability.
- Easy access central scallop at rear of desktop.
- Metal-to-metal fixings connecting substructure to the desktop.
- Height adjustment from 660 to 960mm.

Seating.

Supporting you while you work.

While comfort is a priority in any seating design, the right work space seating has to go above and beyond. From the feature pieces in reception and collaborative spaces, evoking personality as well as function, to the all important task seating, all of our ranges aim to be user–centric.

Our designs provide support and durability to meet evolving workplace demands.

Task seating.

Multi-purpose seating.

Soft seating.

Task seating.

Supporting you while you sit.

The centre of the workplace – the chair. No matter how many times its outward appearance is reinvented by designers, it always comes back to the classic shape that supports healthy seated posture.

The best task chairs incorporate adjustable lumbar support and ergonomic elements. Some task chairs are specifically designed to help in the rehabilitation of people with lower back pain and other musculoskeletal problems.

Functionality to promote dynamic movement such as a comfortable swivel motion, back tilt for reclining, arms that can be raised or lowered, and seats that curve towards the floor at the front to avoid placing pressure on the legs, all work together to support the user's body and enhance wellbeing and productivity.

Calculus.

Breeze.

Crest.

Accord.

Ergometrix Deluxe.

Hydro.

Calculus.

Calculus boasts options to suit the most demanding applications.

Calculus work chairs are fitted with gas height adjustment and 7-step ratchet back 80mm height adjustment as standard, along with a choice of three optional mechanisms. A cantilever visitor chair is also available to complement the range.

Mechanisms.

Permanent Contact Back (PCB)
The back of the chair can either be locked in position or left in free-float (30º tilt) to remain in contact with the user as they move.

PCB + Independent Seat Tilt (IST)
Back movement as PCB mechanism with a separate forward 3.5º and backward 8º tilt on the seat.

Synchronous (Sync)
The ease of movement of the back can be adjusted to suit the weight of the user by adjusting the knob which is situated under the seat. The seat and back move together in a ratio of 2:1 and can be left in free-float or locked in a preferred position.

Folding arms.

Ergometrix.

Permanent Contact Back (PCB)
The backrest can either be locked in position or left in free-float mode, allowing it to remain in contact with the user as they move.

PCB + Independent Seat Tilt (IST)
This mechanism combines the movement of a PCB backrest with an independently adjustable seat tilt (8° backwards and 3.5° forwards). The independent seat tilt allows for a more precise angle between the seat and backrest. When unlocked, the chair rocks from a semi-knee tilt point, enabling dynamic movement without altering the trunk-to-thigh angle. Tension control lets you adjust how easy or difficult it is to recline.

Synchronous (Sync)
The backrest and seat move together in a 2:1 ratio and can be left in free-float or locked into a preferred position. The ease of movement is adjustable via a tension control knob located under the seat, allowing you to tailor the recline resistance to your body weight.

Ergometrix sets the benchmark for reliable, affordable, and comfortable operator chairs.

This ratchet-back ergonomic task chair offers excellent adjustability and is available with specialist adaptations such as thoracic support, lower back and seat pump-up lumbar. Ergometrix can also be specified with a coccyx cut-out seat option for enhanced comfort.

Features:

- Nylon shell rear back.
- Contoured BS5852 moulded CMHR foam back and seat for enhanced comfort.
- Waterfall front seat edge to reduce pressure behind the knees.
- Enhanced thoracic and lumbar support.
- Minimum 95% recyclable, featuring Eco Chrome 3 trivalent base and BS 5852-compliant foam.
- Tested to BS 5459 standard for 24-hour use and weight loading.
- 80mm height adjustable ratchet back (backrest height: 620 mm high back, 550 mm mid back).

Ergometrix Deluxe.

A highly supportive ergonomic task chair designed for exceptional comfort and adjustability.

This range features a height-adjustable ratchet back as standard and can be tailored with a variety of specialist options, including thoracic and lower back support, pump-up lumbar in the seat and back, an optional headrest, and a coccyx cut-out seat for added comfort and pressure relief.

Features:

- Contoured BS5852 moulded CMHR foam back and seat for enhanced comfort.
- 590mm high backrest with an additional 80mm height-adjustable ratchet mechanism (standard).
- Enhanced thoracic and lumbar support.
- Waterfall front seat edge to reduce pressure behind the knees.
- Minimum 95% recyclable, featuring Eco Chrome 3 trivalent base and BS 5852-compliant foam.
- Tested to BS 5459 standard for 24-hour use and weight loading.

Permanent Contact Back (PCB)
The backrest can either be locked in position or left in free-float mode, allowing it to remain in contact with the user as they move.

PCB + Independent Seat Tilt (IST)
This mechanism combines the movement of a PCB backrest with an independently adjustable seat tilt (8° backwards and 3.5° forwards). The independent seat tilt allows for a more precise angle between the seat and backrest. When unlocked, the chair rocks from a semi-knee tilt point, enabling dynamic movement without altering the trunk-to-thigh angle. Tension control lets you adjust how easy or difficult it is to recline.

Synchronous (Sync)
The backrest and seat move together in a 2:1 ratio and can be left in free-float or locked into a preferred position. The ease of movement is adjustable via a tension control knob located under the seat, allowing you to tailor the recline resistance to your body weight.

Multi-use seating.

One chair; a variety of uses.

Unlike the desk chair, some seating designs are required to meet multiple demands in the space of a single day. This versatility must never come at the expense of comfort. Our range of multi-use seating is up to the challenge.

We offer seating solutions that are functional but always stylish. From meeting rooms to collaborative spaces and dining areas, our versatile designs look at home in any commercial setting. They deliver unrivalled practicality for a range of everyday usage.

Figo.

Figo lounge seating's sculpted seat and back cushions make it both eye-catching and timeless.

Figo seamlessly crosses the line between retro style and contemporary design. The high back chair, with provocative lines and curves, is ideal for when people need time to unwind and recharge, and the medium back is ideal for a relaxed or casual collaboration.

Screens & pods.

Preserving your privacy.

Our screen range offers a friendlier way to subdivide space within any setting. These practical office additions protect privacy, help concentration, and decrease the risk of infection transmitting among workers. Individuals can focus on their personal tasks while still feeling part of a team. In addition, these screens also offer acoustic properties.

Our screens support the changing culture and demanding needs of today's workplaces.

Zone floor-standing screens.

Zone's clean, crisp, angular design has been designed to reflect the lastest trends in office furniture.

The use of intelligently designed aluminium extrusions ensures that Zone screens will integrate with the Trio and Halo ranges of desktop screens which, in turn, integrate seamlessly with many desk frames. Zone screens are pinnable as standard.

InnoPod.

A flexible mobile workspace perfect for creating a private area exactly where you need it.

Away from all the hubbub of the office, InnoPod creates an excellent barrier against acoustic and visual distractions. Available in two sizes taking up only about one square meter, the InnoPod is perfect for any open plan work area or breakout.
Contact our sales team for fabric and top options.

Standard fabric finishes available for INNOPOD are Hush or Chili, from the Gabriel range of 100% post consumer, flame retardant polyester.

Alternative fabrics are available as POA.

Sustainable
upholstery.

Contributing positively through fabric choices.

To meet demand, some manufacturers rely on virgin synthetic materials that are cheap and quick to produce which often take decades to biodegrade. With textiles making up over seven per cent of solid waste in landfills, it's time to take a closer look at our upholstery choices.

Southerns Broadstock Interiors is proud to work with trusted fabrics partners to deliver our customers bespoke solutions with sustainability in mind.

Whenever possible, we recommend fabrics that are made from recycled or natural materials to reduce environmental impact.

By promoting sustainable fabrics, Southerns Broadstock Interiors are contributing to the reduction of waste, water conservation, lower carbon emissions, and soil regeneration while helping our customers meet their net-zero targets.

The benefits of using sustainable fabrics:

Eco-friendly.
Reduce the impact of your seating on the environment.

Biodegradable.
At the end of the product's life-cycle it won't sit in landfills for years.

Locally sourced.
Bast fibres can be grown and manufactured in the UK reducing their carbon footprint.

Comfort.
Sustainable fabrics have soft, flexible fibres making them comfortable and durable.

Naturally beautiful.
They come in a wide range of textures, colours and patterns.

Safer seating.
Higher natural fire retardency with a reduced need for harmful chemical treatments.

Fabrics
for seating & screens.

Our fabric portfolio has been curated for style, quality, durability and sustainability for a variety of environments and challenges.

Working closely with our supply chain, we offer fabric lines from Camira, Kvadrat, Panaz and more to ensure we keep in line with current trends and also support our supply chain partners to deliver expectations.

Due to the difficulties in reproduction of printed colours, please contact a sales team member if you require fabric or wood samples.

Sustainable.

Our innovative fabric partners have developed eco-conscious fabrics which help reduce the carbon footprint of our soft-furnishings. Southerns Broadstock Interiors are committed to meeting our own sustainability targets and to work with clients on their net-zero journey.

Durable.

Our durable fabrics improve the quality and longevity of our products. Resilient fabrics means that our seating and screen ranges look great without the need for regular upholstery repairs and even replacements.

Clean.

Our antimicrobial fabrics have been treated to keep microbes such as bacteria, fungi, and viruses from growing and multiplying within their fibres, making them ideal for the most demanding environments and in the most challenging times.

Safe.

Crib 5, also known as Ignition Source 5, refers to material or furniture that's been tested to pass UK Fire Regulations. Our fabrics meet or exceed the standards expected from contract furnishings.

Some of the intelligent fabrics we offer:

Camira Oceanic.
Created entirely from post-consumer recycled plastic – from discarded debris floating in our seas.

Kvadrat Hallingdal 65.
A classic wool and viscose blend with exceptional durability and a natural ability to regulate temperature and moisture.
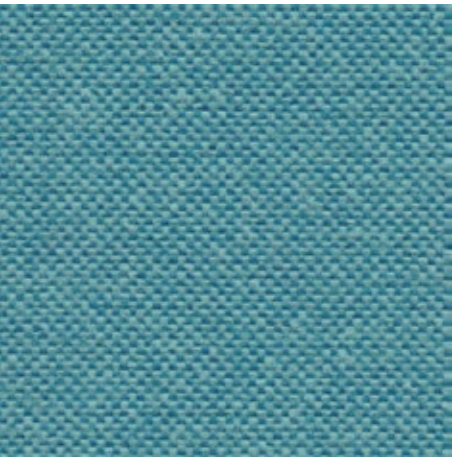

Panaz Highland Plan BC.
A performance upholstery fabric designed for demanding environments. Durable, Crib 5 compliant, and easy to clean.

Agua Furnisoft Breathable V.
A breathable, waterproof, and antimicrobial vinyl designed for high-traffic environments. Combines hygiene with comfort for healthcare and hospitality use.

Inloom Jet Bioactive.
Engineered with antimicrobial properties to help inhibit bacteria and fungi. Ideal for hygiene-sensitive spaces requiring added protection.

Gabriel Medley.
Made from 100% post-consumer recycled polyester. Combines acoustic performance with sustainable credentials and contract-grade durability.

Fabric band guide.

This is just a selection of the cover options available. We are able to source alternative fabrics and vinyls, please contact the sales team for more information.

Suitable for Soft Seating?

Yes – Whilst we have worked closely with the individual fabric manufacturers and our supply chain to avoid any incompatibility for Soft Seating, there still may be instances where some products are unable to be upholstered in a particular fabric range / certain shades due to the manufacturing process or properties of the material.

Sample – We / our supply chain will sample the suitability of this material range upon request.
